compliance

Microsoft Cloud for Financial Services

Trusted cloud to accelerate innovation for sustainable growth

Deliver differentiated customer experience

Provide tools to help accelerate customer growth, profitability, and loyalty through more relevant and personalized interactions along with deeper customer insights

Empower employees through teamwork

Help fuel employee productivity, enhance process efficiencies, and strengthen customer connections through automation, collaboration, and communications

Combat financial crime

Help enhance customer experience, lower account fraud, and boost profitability

Built on a foundation of:

Trust, security, and compliance

At Microsoft we are focused on trust, and we adhere to security and privacy standards to place you in control over security, encryption, and governance

Interoperability

Help ease interoperability and unify data with an industry data model and connectors to help accelerate insights and business workflows

Microsoft Cloud for Financial Services

Capabilities for Retail Banking

Partner ecosystem

Microsoft Cloud

Customer and employee experience

“With our Microsoft-based solution, our relationship managers now have the tool they need to serve clients even more successfully, build and maximize relationships, and identify and act on new opportunities.

— Anneke Broere

Business Owner of ClientLink at Rabobank

Unified customer profile

Help tailor customer experiences via a comprehensive view of the customer's financial situation

Customer insights

Financial details, such as life events and household information, help create a single customer view

Summary view

Insights drawn from unified customer information help drive better customer outcomes

Banking segments

Segmentation helps you focus on the right customers and opportunities to increase success

Churn risk

Adaptive AI helps anticipate customer abandonment so you can work proactively to reduce risk of churn

Unified customer profile

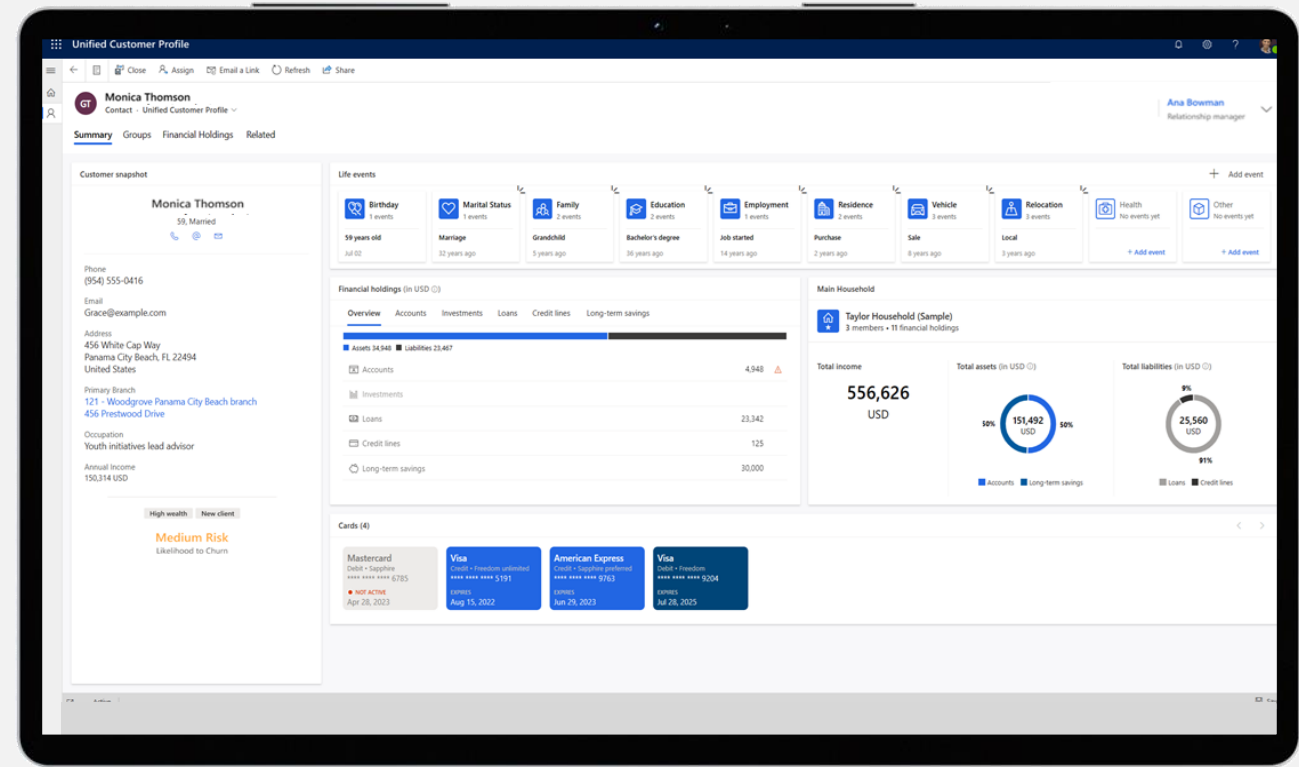

Combine customer and behavioral data to help anticipate opportunities and churn with pre-built AI for financial services

Customer 360 unlocked

- Centralize your customer data in a single place via Microsoft Dataverse and the industry data model
- Benefit from a data-first experience that helps bring together financial details, life events, and household information into a single view
- Leverage 500+ built-in connectors to bring in your customer-relevant data and information
- Build custom applications leveraging our controls with low- and pro-code tools
- Build custom connectors to nearly any system of record or data source and integrate apps and data directly

Relationship manager productivity

- Help drive better customer outcomes with insights drawn from unified customer information
- Leverage a purpose-built banking churn model to help understand churn risk at a glance
- Leverage our existing banking segments and bring in your own rules and definitions
- Offer the most accurate and important customer information to your relationship managers to improve the customer experience

Unified customer profile

Customer insights

Financial holding

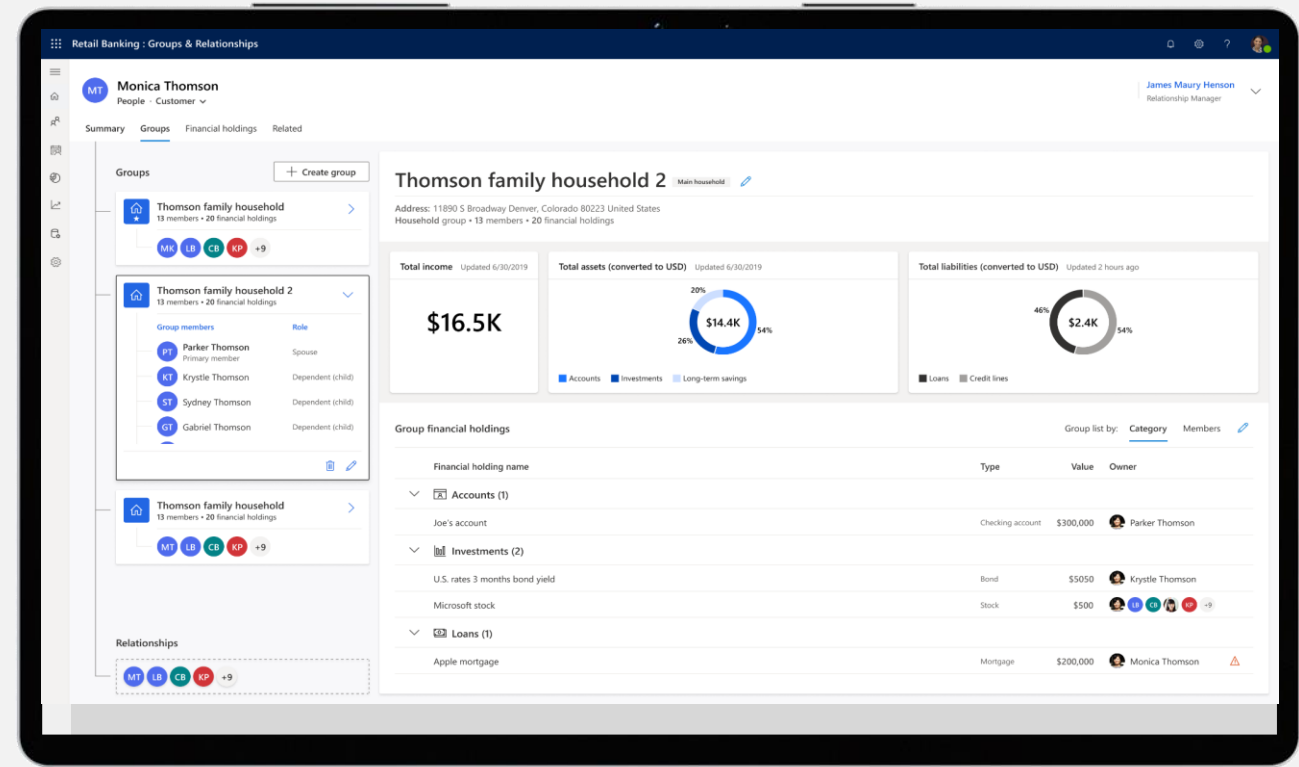

Empower bank agents to quickly understand wallet share, total assets and liabilities, and key flags related to holdings to help surface opportunities and deepen relationships

Life events

Offer at-a-glance view of life milestones to help identify financial opportunities, create personalized offers, and deliver consistent engagement experiences across bank agents

Connections

Help bank agents understand the "impact and influence" of their customers, the potential financial strength of the customer, based on their groups and relationships, e.g., familial connections

Unified customer profile

Banking churn risk

Churn model tailored for retail banking

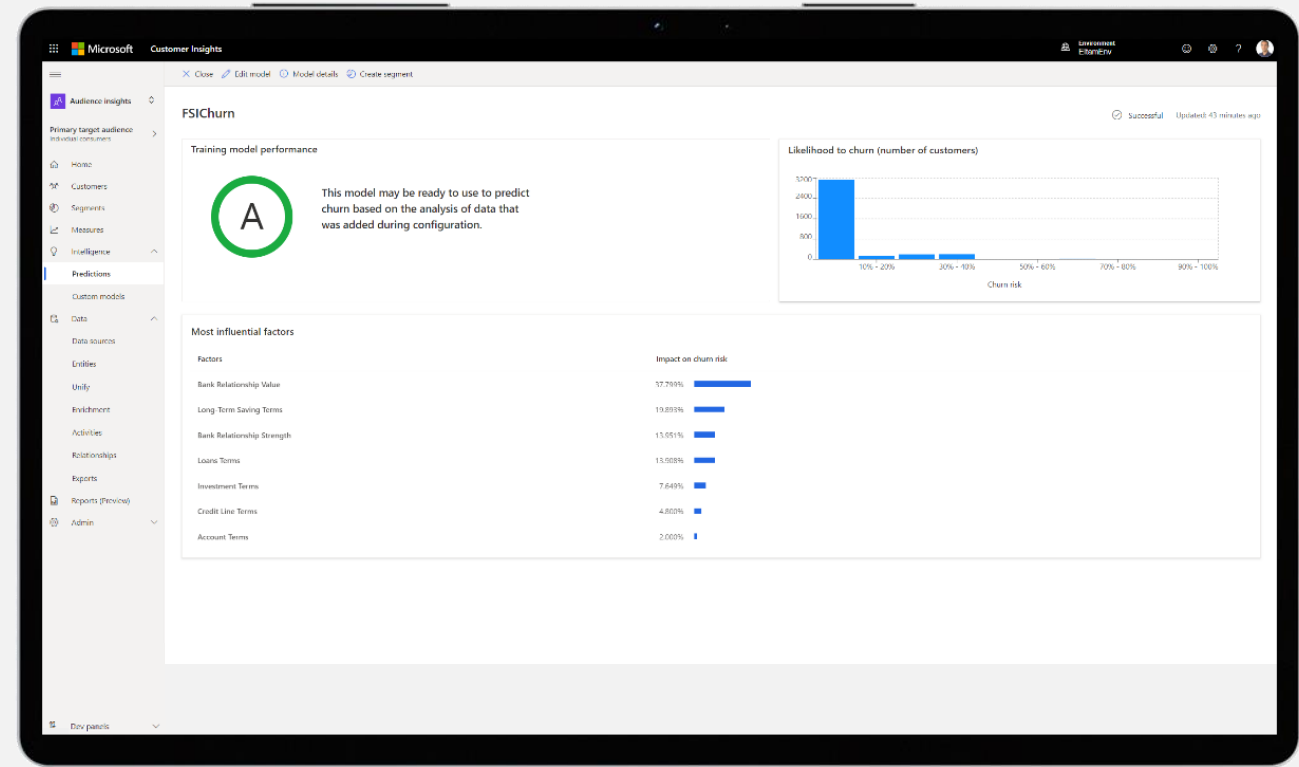

Help predict the probability of customers leaving the bank, via banking-specific considerations. This enables a proactive approach for identifying and retaining customers via relevant incentives and personalized customer service

Configurable to meet specific needs

Easily update the data model without needing a data scientist using churn data model configuration

Built atop the industry data model

Leverage the same industry data model used across Microsoft Cloud for Financial Services capabilities to offer AI-powered insights within the application layer

Unified customer profile

Dynamics 365 Customer Insights

Bring together customer data with prebuilt connectors

Ingest transactional, behavioral, and demographic data in real time for the most up-to-date view of your customers via more than 500+ built-in connectors

Streamline data standardization

Reconcile conflicting data and resolve customer identities using map, match, and merge to create comprehensive profiles

Enrich profiles with interests and preferences

Gain a single view of the customer with proprietary audience intelligence from Microsoft Graph and with industry enrichment sources

Dynamics 365 Customer Voice

Augment profiles with customer feedback, with segments based on customer satisfaction that help keep track of customer attitudes as well as tailor experiences to improve or sustain them over time

The screenshot displays the Dynamics 365 Customer Insights application interface. The left sidebar contains a navigation menu with options: Home, Customers, Segments, Measures, Intelligence, Data, Data sources, Entities, Unify, Enrichment, Activities, Relationships, and Admin. The main content area is titled 'Data sources' and features a table with the following data:

Name	Entities	Status	Refreshed	Actions
Dynamics365	4	Available	09/21/20, 12:13:25 PM	
POS	2	Available	09/21/20, 12:19:16 PM	
Website	2	Available	09/21/20, 2:41:48 PM	
ChurnModel	2	Available	09/22/20, 11:46:45 AM	
Dynamics365CustomerVoice	2	Available	09/22/20, 11:46:45 AM	

Unified customer profile

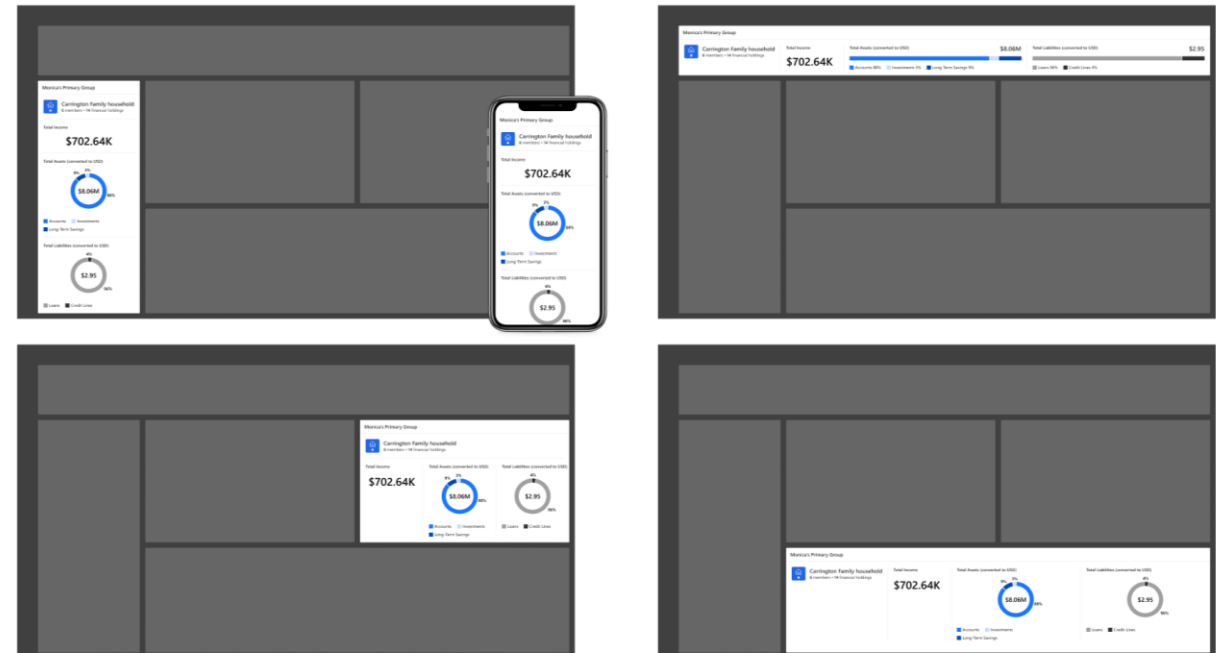

Extensibility

Componentization

Flexibly leverage components and add your own

Embed your processes

Bring your business processes by building custom applications leveraging our controls with low- and pro-code tools

Unified customer profile

Reference architecture

Collaboration manager

Transform lending workflows to help improve productivity, unlock value creation, and enhance customer experience

Lending automation

Intelligent tools help orchestrate lending processes and streamline operations

Cross-team collaboration

Intelligent dashboards help empower teams to collaboratively manage lending volume and centralize task and file management

Communications

Communications features help support customers virtually while meeting security and compliance needs

Public preview edition

Collaboration manager

Automate lending processes, help foster internal collaboration, and facilitate omnichannel communications with customers

Process orchestration

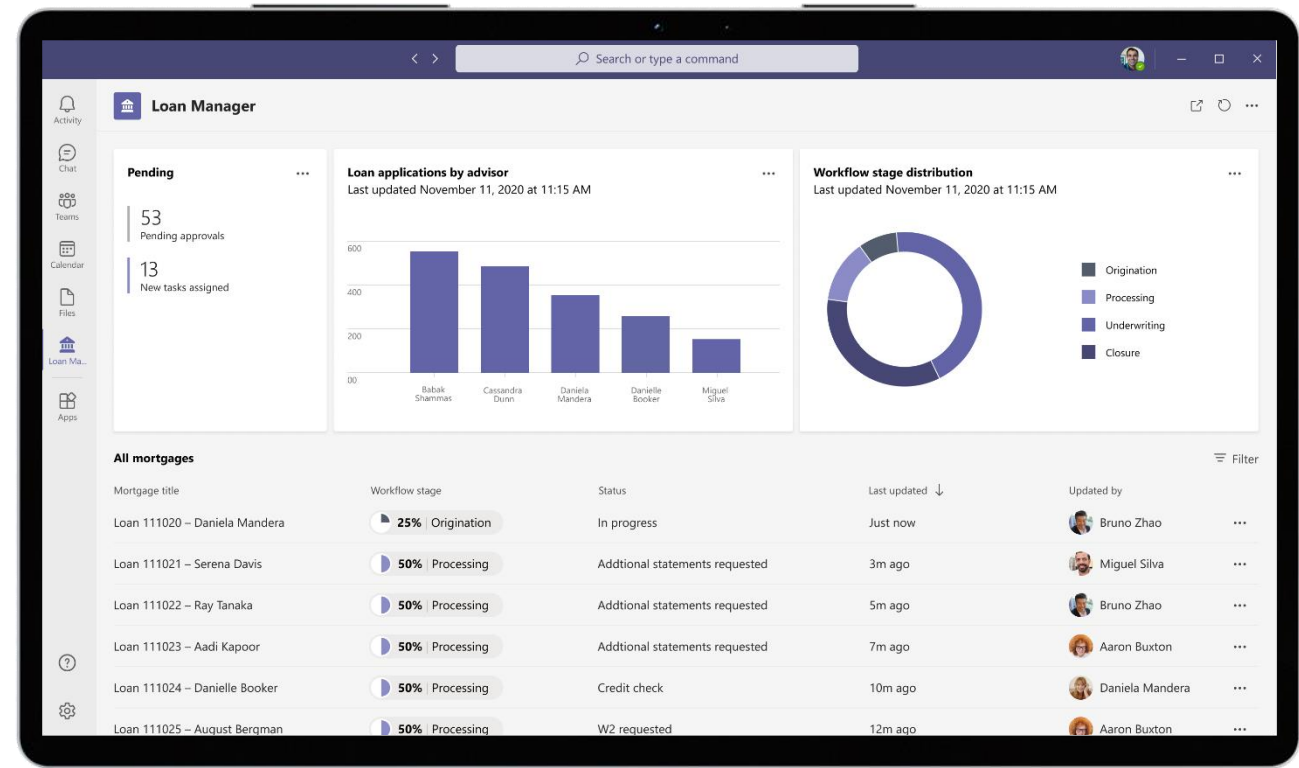

- Create flows with Power Automate triggered right from your Microsoft Teams data
- Use low and pro-code development tools to ideate, test, and deploy workflows
- Save costs and accelerate innovation with intelligent bots and robotic process automation (RPA)

Data aggregation

- Centralize your data via Microsoft Dataverse and the industry data model
- Leverage 500+ built-in connectors to help bring your content, tools, and apps into the Teams workspace
- Build custom connectors to nearly any system of record or data source and integrate apps and data directly into Teams

Centralized task management

- Start a list from scratch or save time with pre-built templates in Lists
- Manage teams' tasks from Planner and individual tasks from To Do
- Assign specific tasks to individuals or teams and easily track actions

Public preview edition

Collaboration manager

Automate lending processes, **help foster internal collaboration**, and facilitate omnichannel communications with customers

Document management

- Ingest and store customer loan documents in SharePoint or third-party document repositories
- Collaborate on documents, assign tasks, and route for approval

Approval management

- Create, manage, share, and act on approvals across your structured and unstructured systems from the Approvals hub in Teams
- Leverage integration with Adobe Sign and DocuSign for electronic signatures on loan documents, including Live Signing and notarization

Public preview edition

Collaboration manager

Automate lending processes, help foster internal collaboration, and **facilitate omnichannel communications with customers**

Appointment scheduling and booking

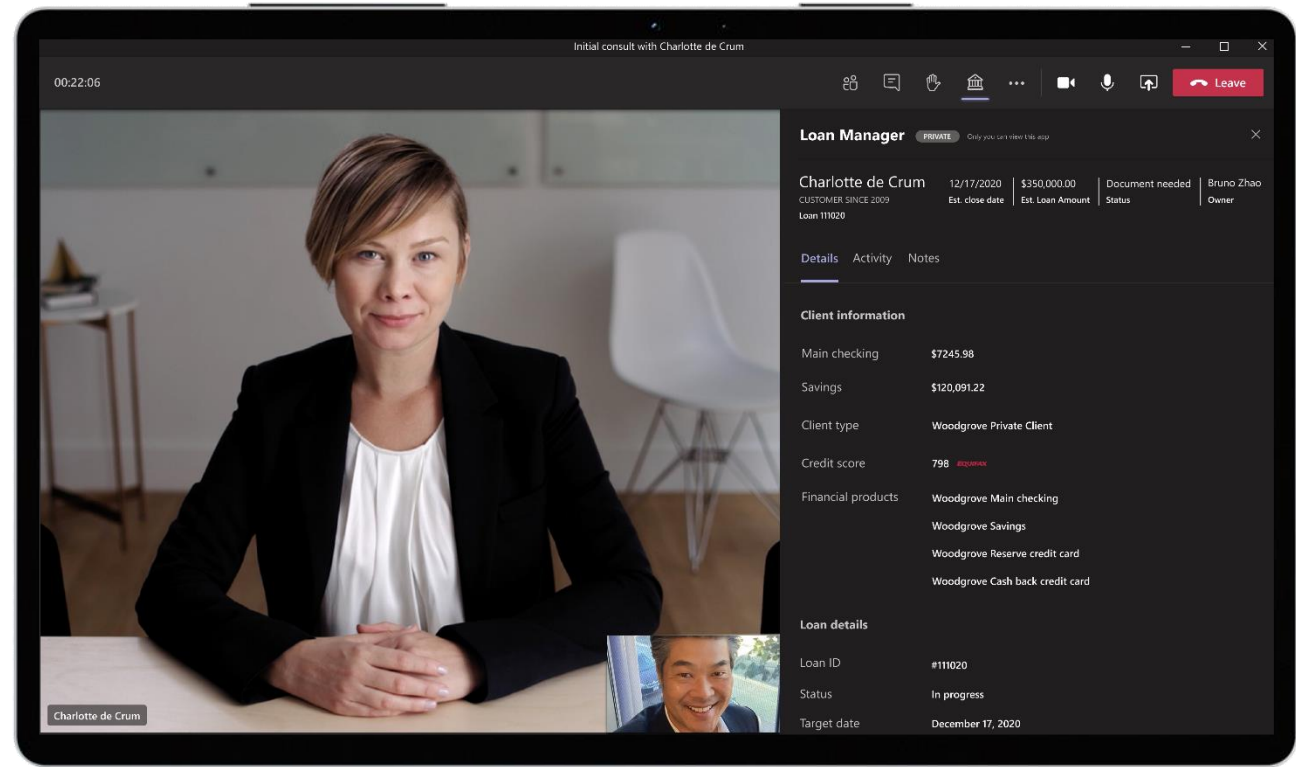

- Use the web-based booking calendar of Bookings and integration with Outlook to help optimize staff calendar's and empower customers with flexibility for scheduling
- Conduct virtual appointments via Teams and manage day-to-day scheduling via the Bookings app in Teams

Real-time communications

- Help drive robust bank-to-customer and front-to-back-office digital communications with Teams
- Embed customer information from CRM systems (Dynamics 365 and third-party) directly into Teams channels, meetings, chats, etc.
- Utilize compliance capabilities with recording and integration with multiple third-party and compliance systems

Secure messaging

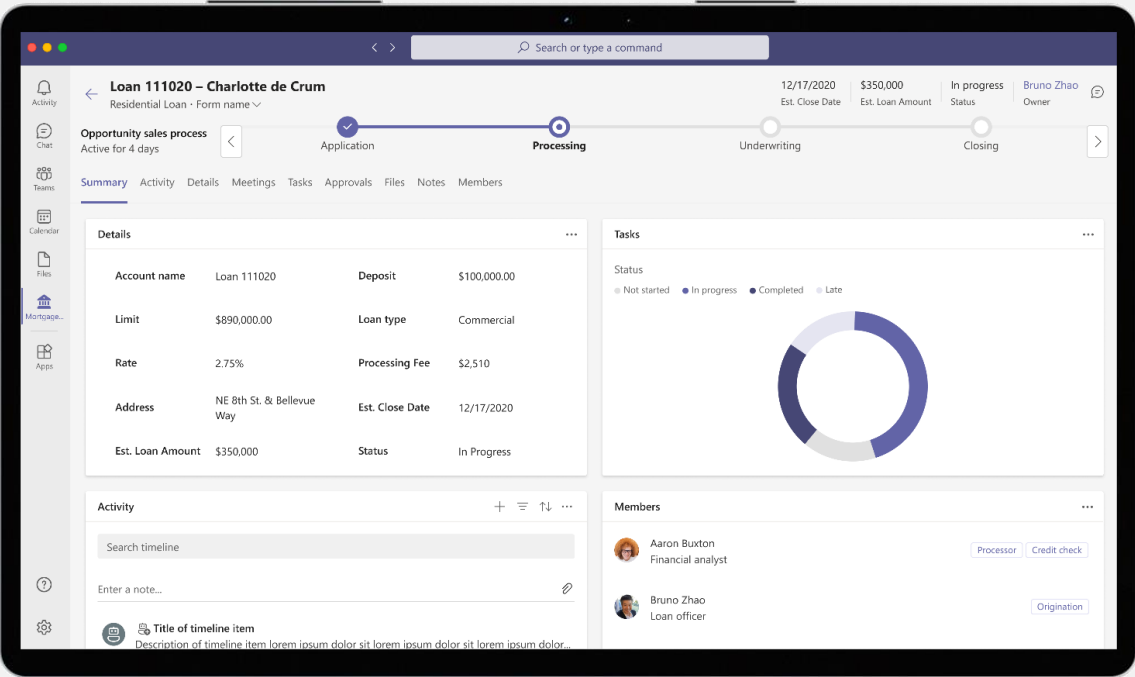

- Leverage priority notifications, tagging capabilities, and read receipts
- Enable federated messaging within Teams to connect with authorized external users
- Automatically escalate messages to another user when an intended recipient is unavailable or out of office

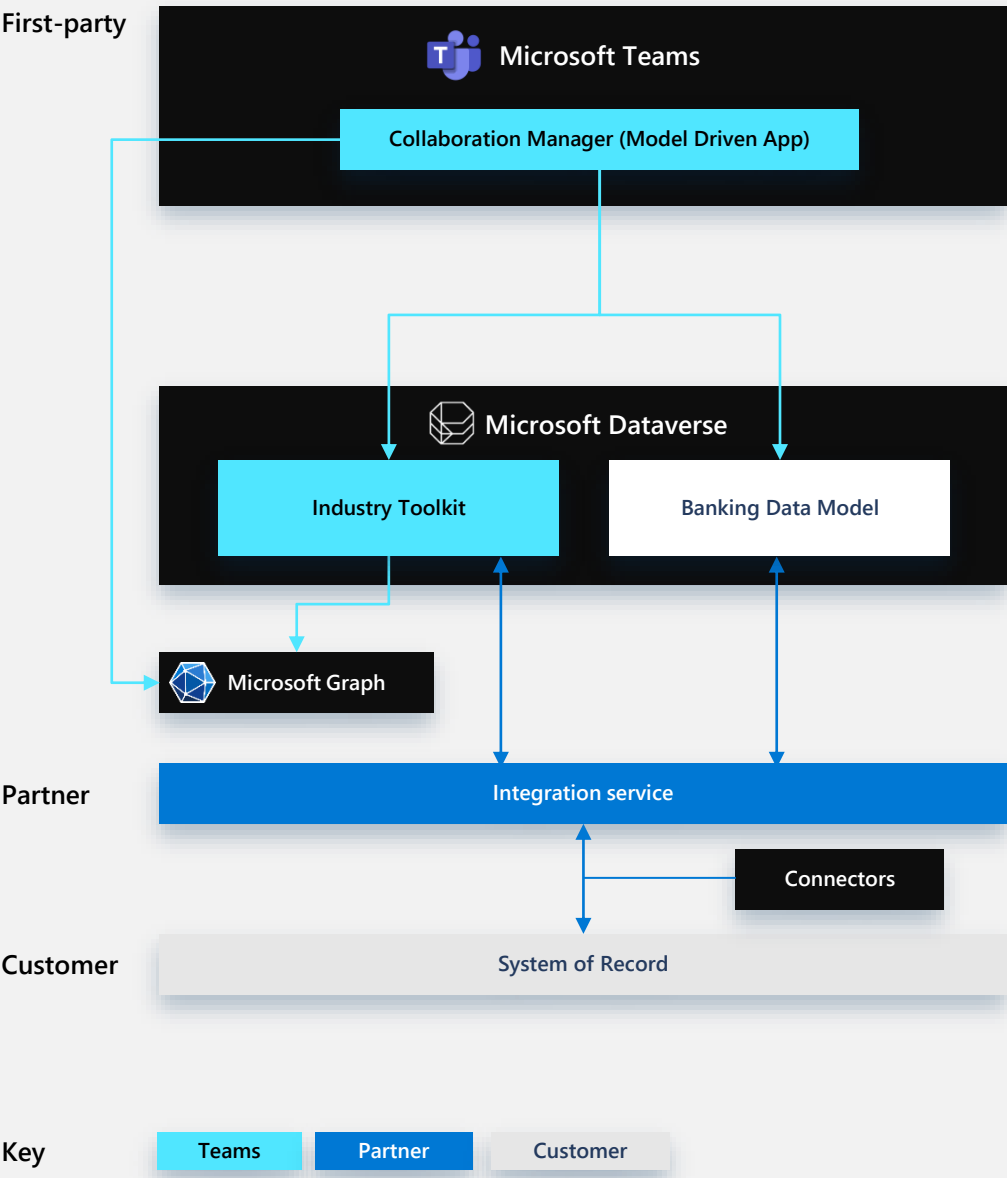

Public preview edition

Collaboration manager

Banking customer engagement

Help personalize customer interactions with relevant financial information to accelerate time to resolution

Personalization

Financial understanding helps personalize interactions for meaningful engagement

Customer service center

Unified customer profiles help empower service agents with the right information to drive towards quick resolution

Omnichannel experiences

A unified agent desktop helps deliver consistent, connected experiences across channels including voice, messaging, and social

Public preview edition

Banking customer engagement

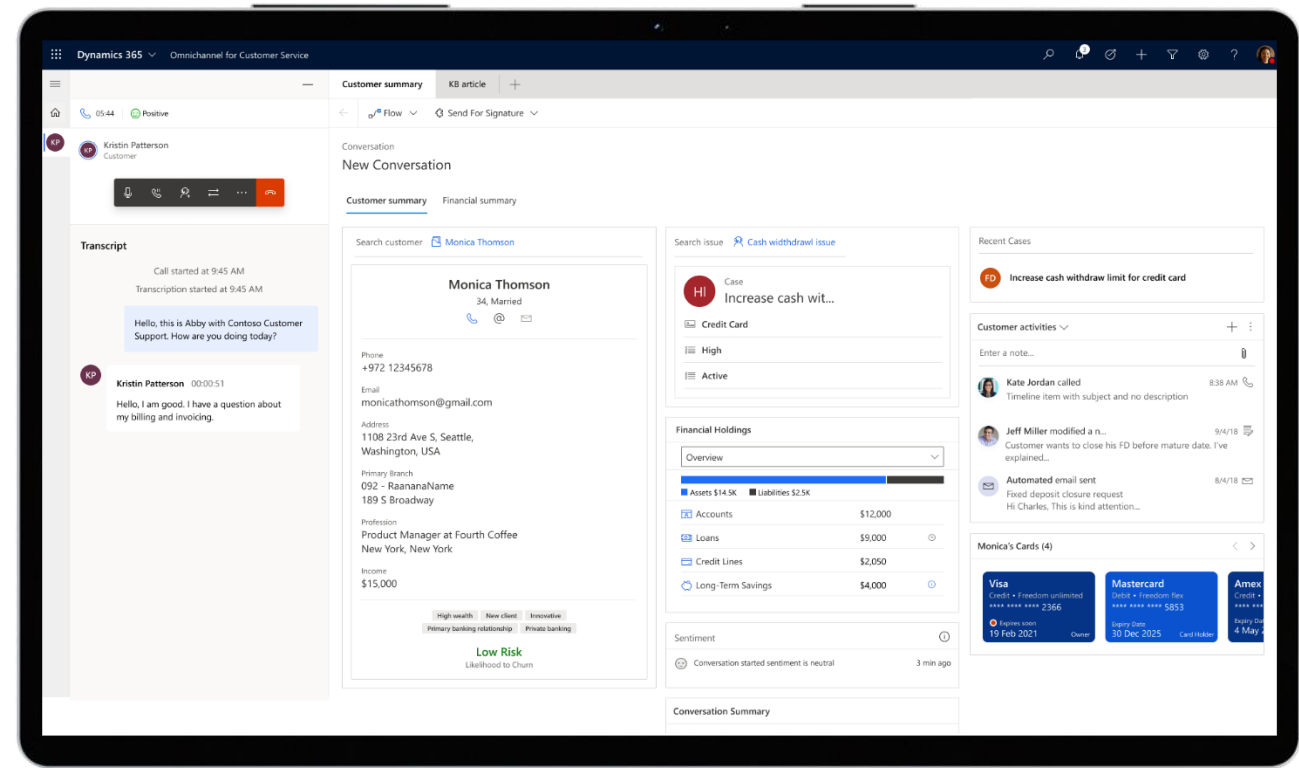

Help personalize customer interactions with relevant financial information to accelerate time to resolution

Financial information in the flow

- Inform customer conversations with an easily available financial summary to help drive better customer engagements
- Help understand the risk of churn at a glance powered by a purpose-built banking churn model
- Leverage our existing banking segments and bring in your own rules and definitions

Accelerate and optimize customer service

- Offer easy access to financial holding details to personalize customer engagements
- Deliver a full customer view within Omnichannel, arming service providers with relevant information at their fingertips

Public preview edition

Banking customer engagement

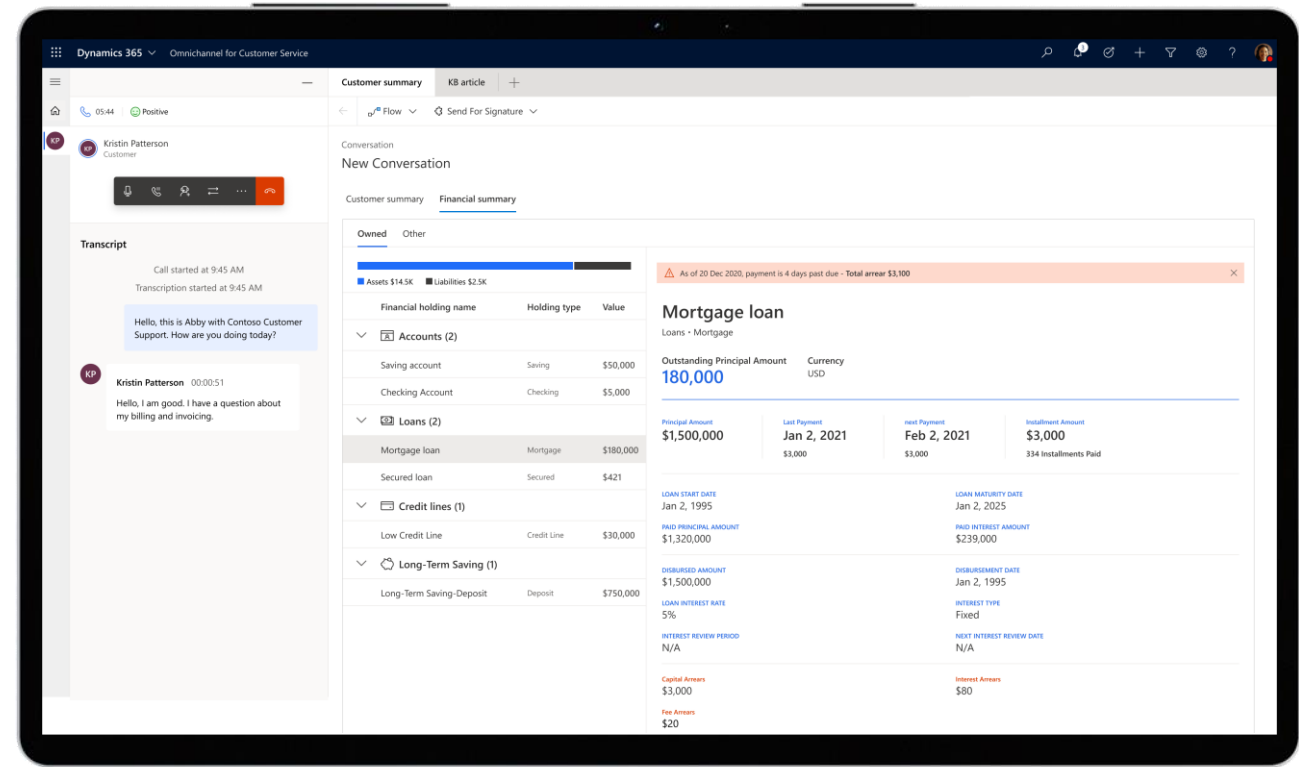

Help personalize customer interactions with relevant financial information to accelerate time to resolution

Engage customers in their preferred channel

- Benefit from consistent, connected experiences across channels including voice, chat, SMS, Facebook Messenger, WhatsApp, WeChat, Twitter DM, and Line – all from a unified agent desktop
- Automate self-service with virtual agents and rich knowledge-base portals via Power Virtual Agent

Leverage experts on the fly

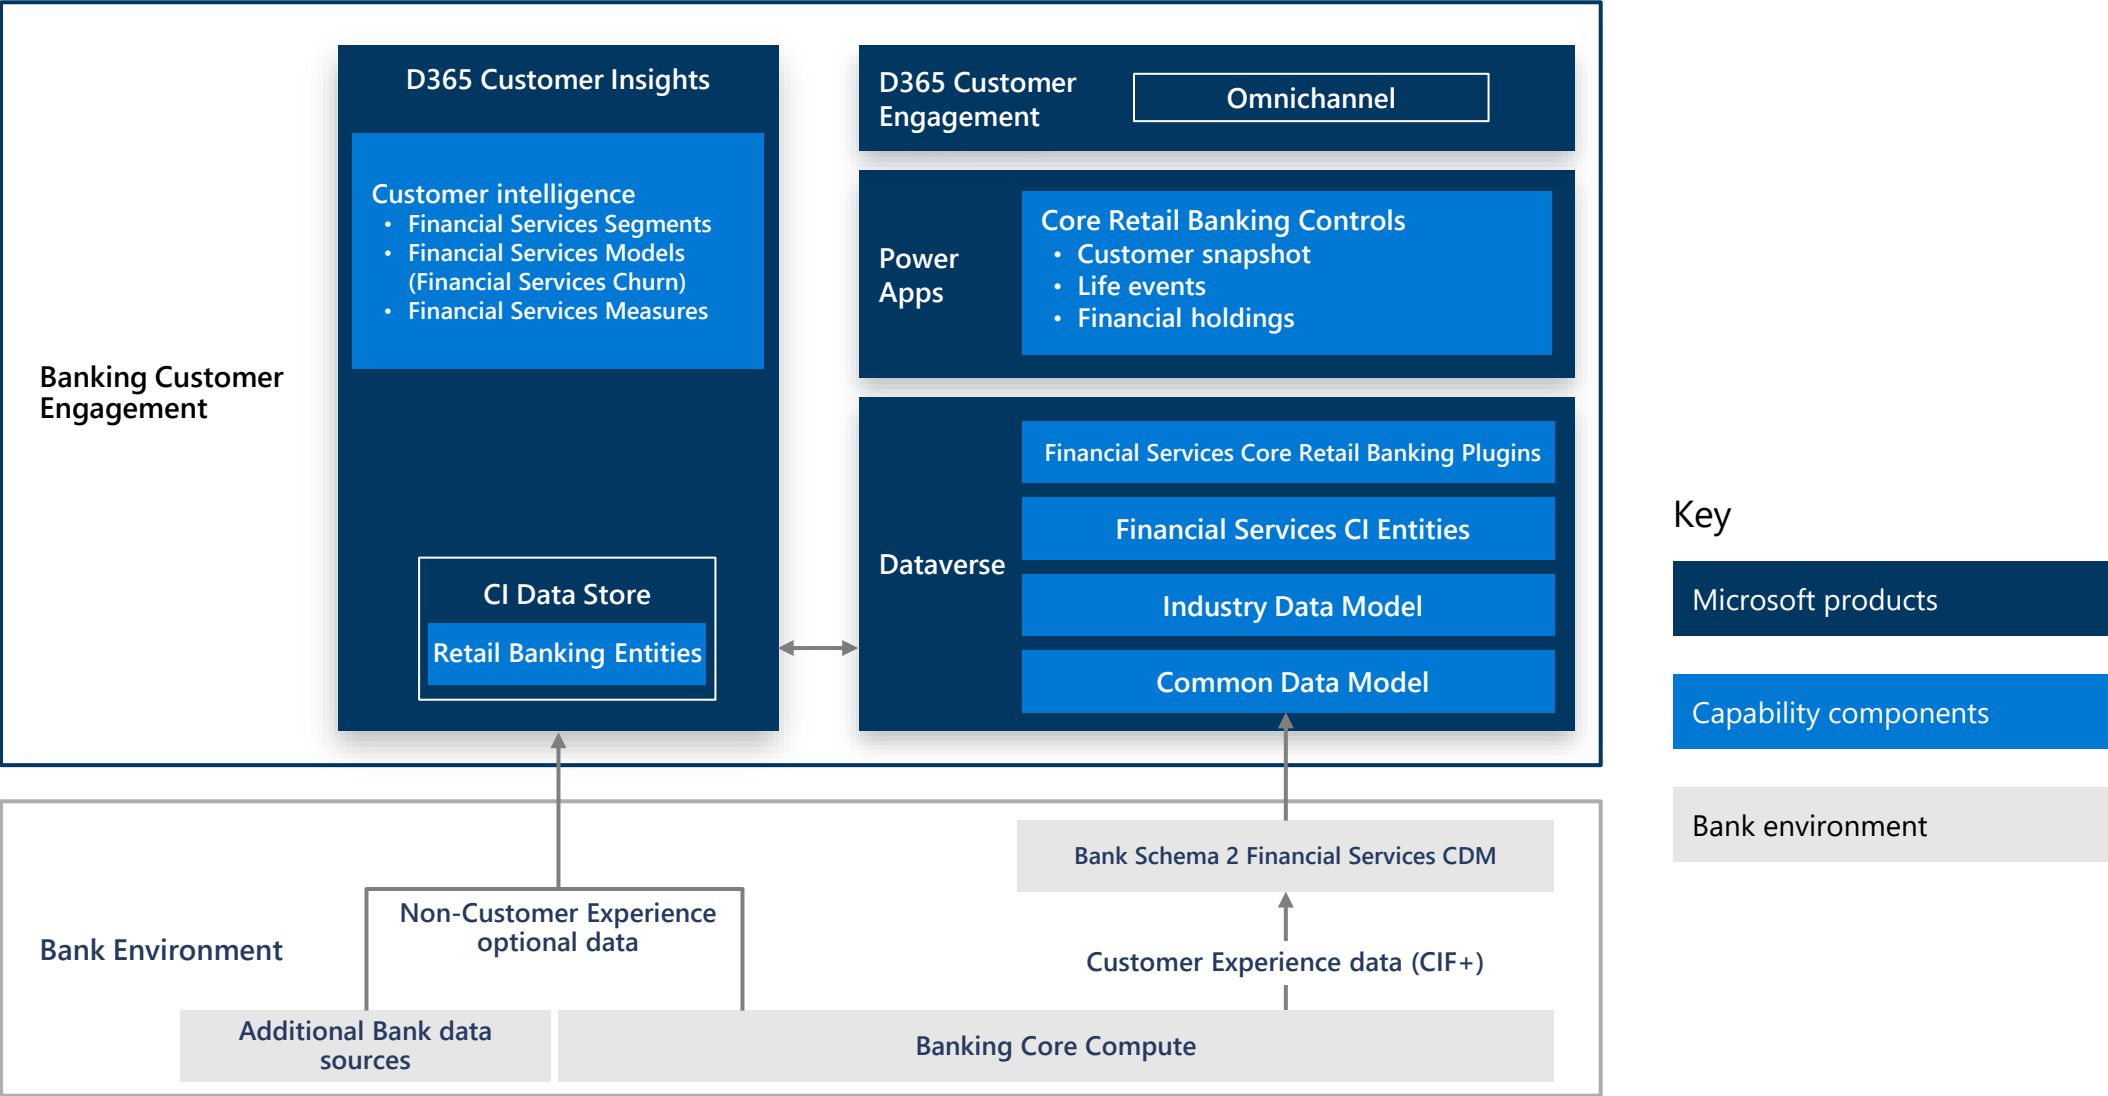

- Use Microsoft Teams to help agents connect with subject-matter experts and resolve complex cases quickly, regardless of their job function or location
- Reference relevant resources quickly with AI-powered suggestions that use real-time context cues to recommend similar knowledge articles or cases

Public preview edition

Banking customer engagement

Reference architecture

The capabilities connect for a unified journey

Combatting financial crime

“Next-gen tech can increase productivity in financial crime operations by 30-75%. These are significant numbers as global spending on AML and fraud operations is estimated at \$31.6B for 2020.”

— Neil Katkov, PhD
Head of Risk and Compliance, Celent

Account protection

Help prevent fraudulent digital account creation and account takeover

Risk assessment and bot protection

Take advantage of these two key services in a single solution

Simple integration

An API within this SaaS solutions helps you easily integrate with your existing systems

Built-in compliance

Leverage an approach built for compliance with encryption of data in transit and at rest

Purchase protection

Help provide a differentiated experience for merchants to improve revenue and retention

Balanced approach

Help reduce loss and decrease false positives to improve merchant profitability

Transaction acceptance booster

Stream live data to your card authorization engine to help authorize more legitimate transactions

Customer value

Help manage fraud for your customers at scale as a service

Security and compliance

“We do not compromise on data privacy. Against that background, the security and compliance functions of Azure were convincing, which is why we chose Microsoft as our competent cloud provider.”

— Lutz Küderli

Head of Underwriting, Claims, Digital Services
and Insurance Medicine (Europe/LATAM)
for Life & Health at Munich Re

Regulatory compliance assessments

Assess, monitor, and help improve compliance posture with global, regional, and industry regulations and standards

Cloud risk assessments

Help accelerate your Microsoft cloud and vendor-related risks assessments

Industry standards

Leverage 40+ pre-built assessments for standards and regulations such as GDPR

Compliance posture

Help improve your overall compliance posture, enhancing security and privacy controls

Risk assurance and support

Leverage white glove service to support risk, audit, and compliance teams with regulatory compliance, security, and privacy

Compliance Summit and Community

Connect with Microsoft Leadership on compliance topics and engage directly with peers and regulators in industry

Ask an expert

Support risk stakeholders to accelerate their assessments and approval cycles

Proactive risk assurance

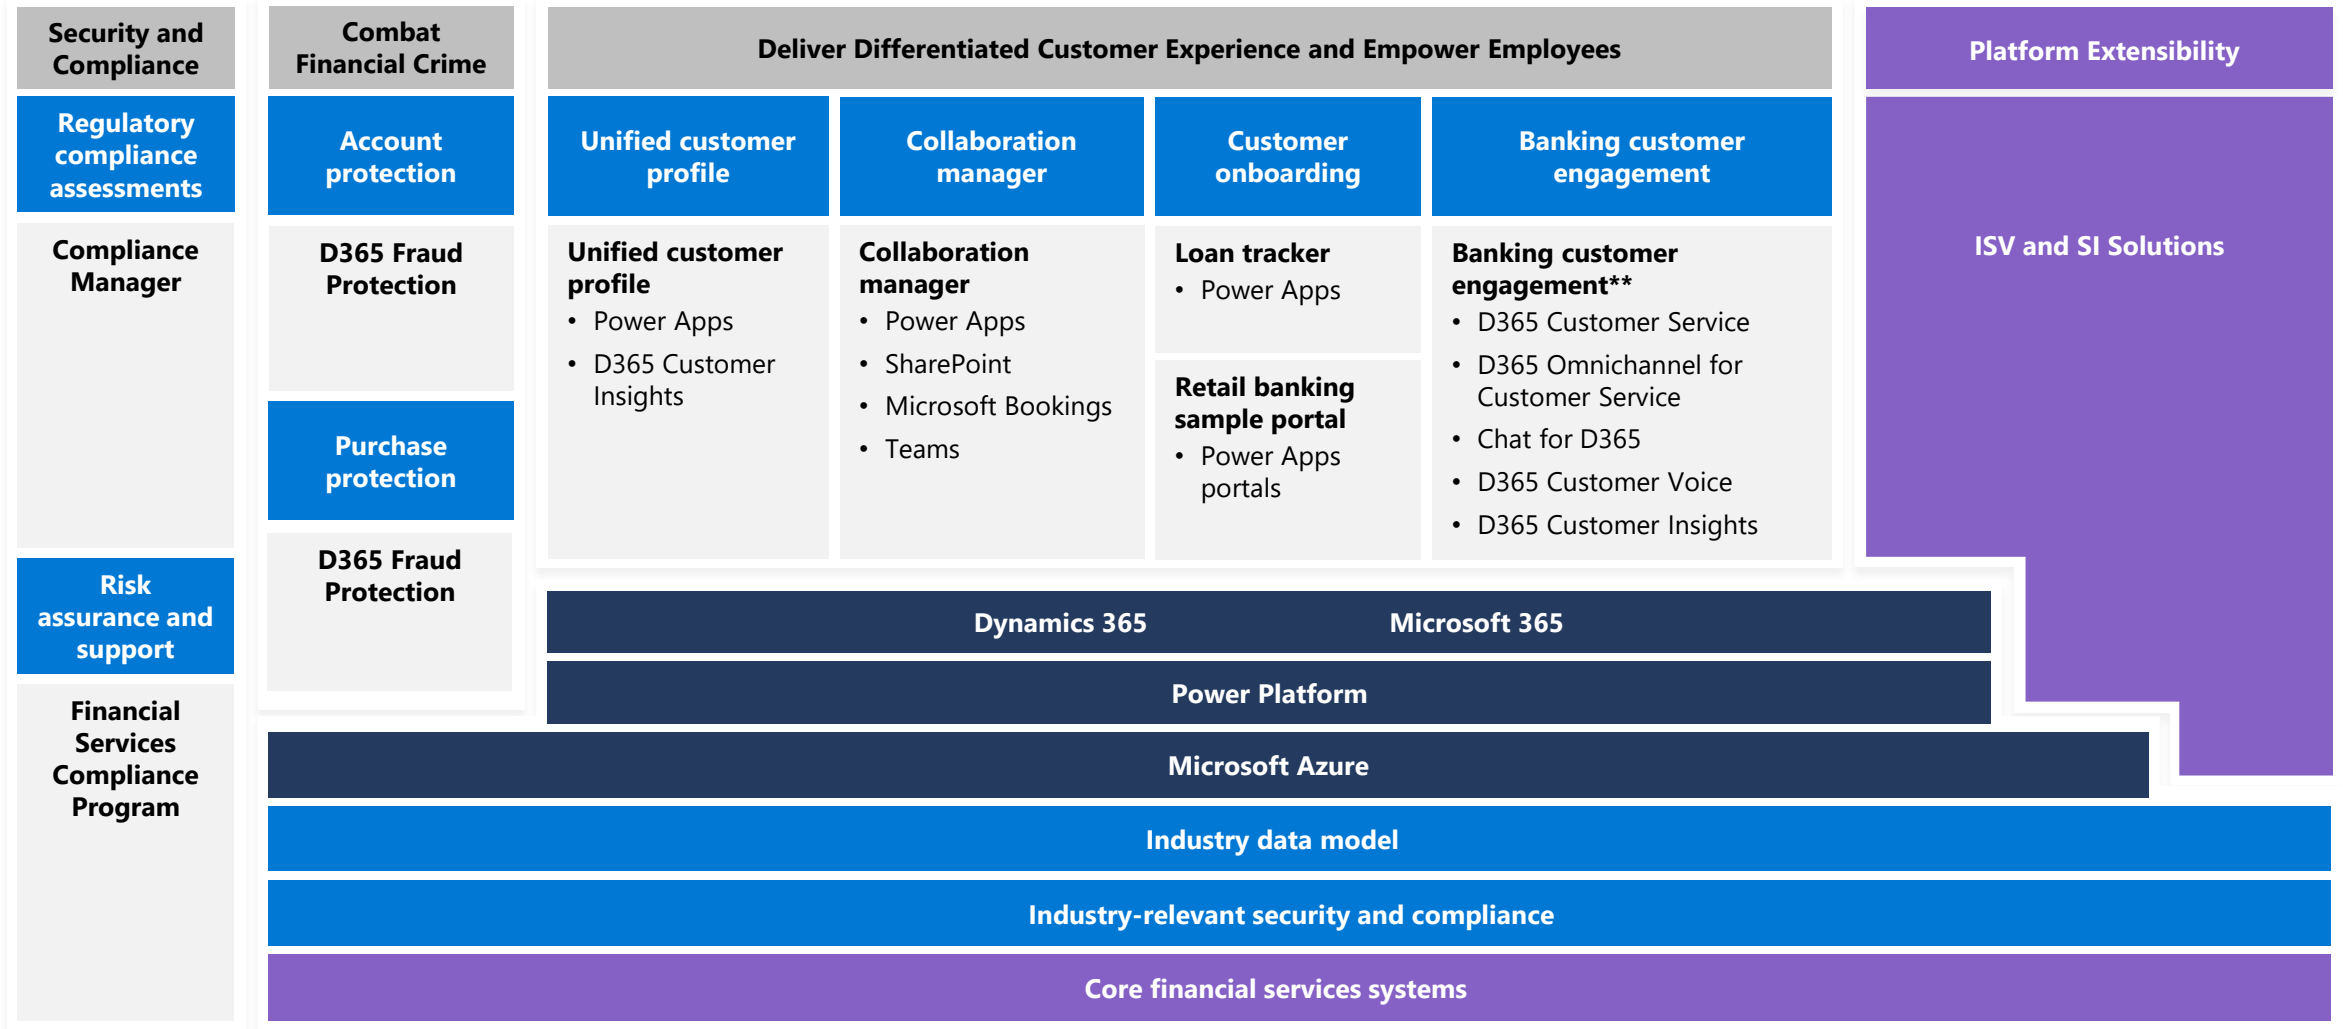

Stay up to date on important regulatory changes and explore walk-throughs of curated audit artifacts

Concierge and learning paths

Upskill on cloud risk assessment and navigate our rich set of resources
